

JAI SINGH BHATI

FRONTEND DEVELOPER and UI/UX

ABOUT ME

Frontend Developer with **1.5+ years of experience** building responsive, user-friendly, and modern web interfaces. Worked on real-time projects, handling everything from UI implementation and responsive design to frontend development and developer collaboration. Currently working at **Timble AI** and previously at **Ezbizsoft**, with a strong focus on creating scalable, performance-driven, and user-centered web applications using modern technologies.

EDUCATION

MCA – Manipal University Jaipur (2023–2025)

WORK EXPERIENCE

timble ai . | feb 2026 – Present

Frontend Developer And UI/UX

At Timble AI, I work as a Frontend Developer, building responsive and user-friendly web applications for product platforms and company websites. I handle frontend development from understanding requirements to implementing modern UI designs, ensuring smooth performance and seamless user experience.

Ezbizsoft | Dec 2024 – Feb 2026

Frontend Developer And UI/UX

I work as a UI/UX Designer, contributing to the design of both mobile applications and web platforms. I design app interfaces using React Native and create modern, responsive website designs for web. I am involved in real-time projects, handling the complete design process from wireframing to final UI, while collaborating with developers to ensure smooth implementation.

Real time projects

• QR-Tigya (Lost & Found Platform)

Designed a user-friendly website for a QR-based lost & found system, focusing on smooth scanning and reporting flow.

• Audit Web Platform

Designed an audit management web app with structured UI for easy navigation, reporting, and data handling.

• Finedge (Fintech App)

Designed a SIP & investment app end-to-end; currently live on App Store & Play Store.

HRMS Portal – Timble HR

Built HRMS portal using React, Tailwind CSS, Node.js, and MongoDB with modules for employee records, attendance, leave, recruitment, and admin dashboard.
